

Signs that each FCAT step has completed running

Time for each step varies with size and variability of the project area and the time frame (start & end year) of the project, so it is best to use the following signs to know when each step is completed.

Step 1: FVS set up

- The standids_table.csv file is in the share/rem/<project_name>/fvs folder

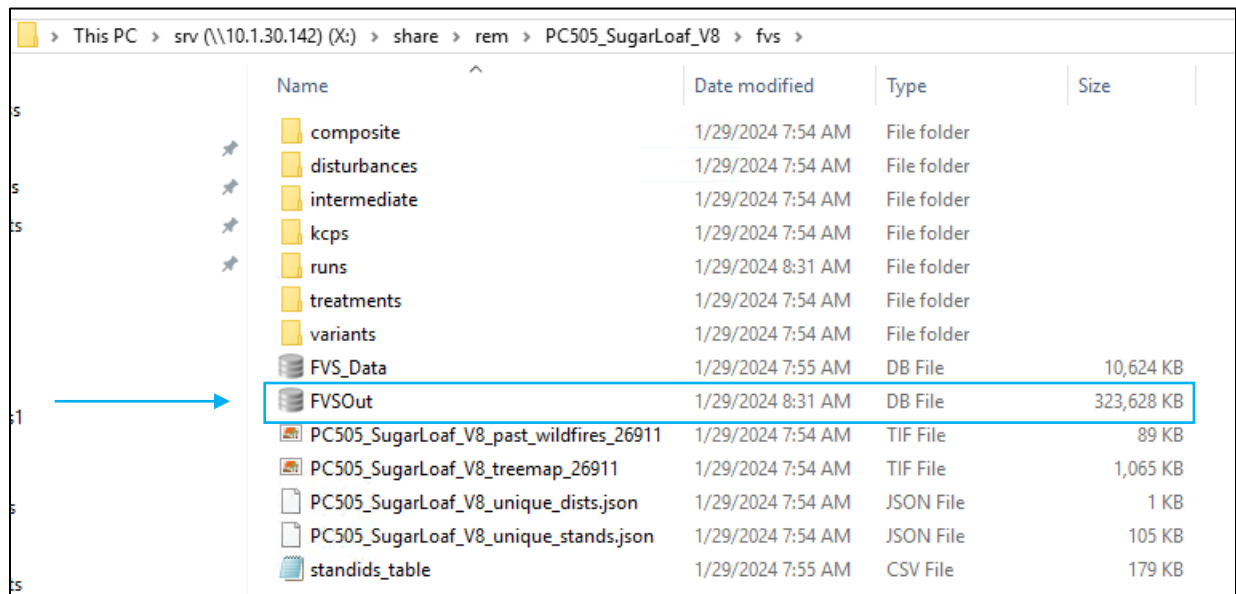

This PC > srv (\\10.1.30.142) (X:) > share > rem > FA018_PFT_thinonly_V2 > fvs >

Name	Date modified	Type	Size
composite	1/31/2024 5:45 PM	File folder	
disturbances	1/31/2024 5:44 PM	File folder	
intermediate	1/31/2024 5:45 PM	File folder	
kcps	1/31/2024 5:45 PM	File folder	
runs	1/31/2024 6:02 PM	File folder

FVS_Data	1/31/2024 5:52 PM	DB File	111,564 KB
standids_table	1/31/2024 5:52 PM	CSV File	1,773 KB

Step 2: FVS execution

- The FVSOut.db file is in the share/rem/<project_name>/fvs folder

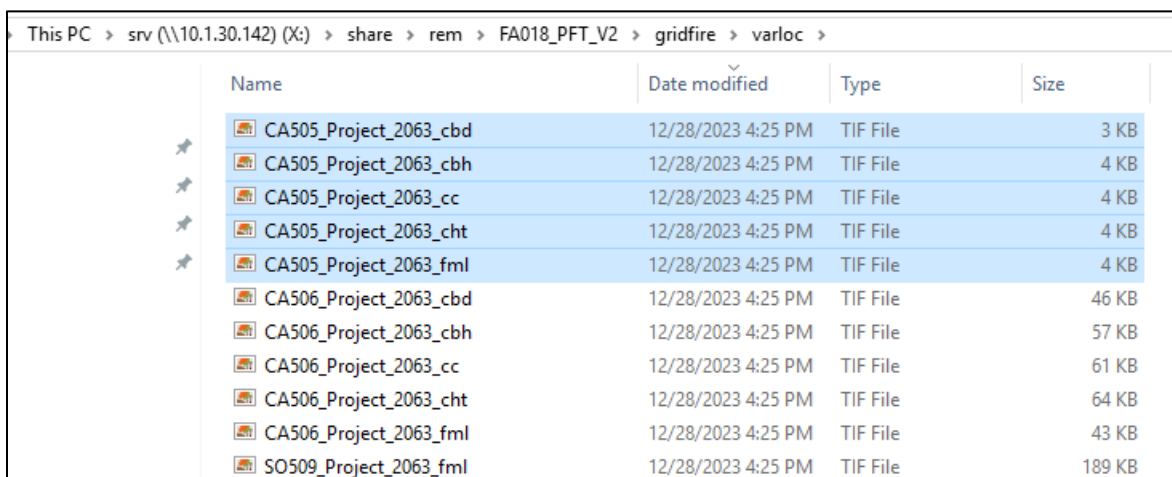

This PC > srv (\\10.1.30.142) (X:) > share > rem > PC505_SugarLoaf_V8 > fvs >

Name	Date modified	Type	Size
composite	1/29/2024 7:54 AM	File folder	
disturbances	1/29/2024 7:54 AM	File folder	
intermediate	1/29/2024 7:54 AM	File folder

standids_table	1/29/2024 7:55 AM	CSV File	179 KB

Step 3: GridFire part 1, Fuels

- All the fuel & canopy .tif files are present in the share/rem/<project_name>/gridfire/varloc folder. There will be a set of 5 .tif files for each variant-location, for each the baseline and project, for each year GridFire is to be run. The last files to be generated in this folder will be for the 'Project' for the GridFire end year, in the example below, the final 5 files to be generated were for CA505_Project_2063_<fuel or canopy variable>.tif.

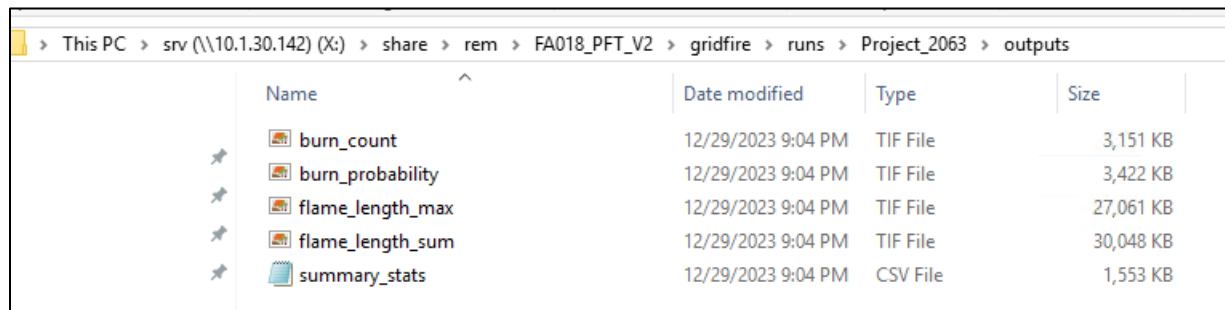

Name	Date modified	Type	Size
CA505_Project_2063_cbd	12/28/2023 4:25 PM	TIF File	3 KB
CA505_Project_2063_cbh	12/28/2023 4:25 PM	TIF File	4 KB
CA505_Project_2063_cc	12/28/2023 4:25 PM	TIF File	4 KB
CA505_Project_2063_cht	12/28/2023 4:25 PM	TIF File	4 KB
CA505_Project_2063_fml	12/28/2023 4:25 PM	TIF File	4 KB
CA506_Project_2063_cbd	12/28/2023 4:25 PM	TIF File	46 KB
CA506_Project_2063_cbh	12/28/2023 4:25 PM	TIF File	57 KB
CA506_Project_2063_cc	12/28/2023 4:25 PM	TIF File	61 KB
CA506_Project_2063_cht	12/28/2023 4:25 PM	TIF File	64 KB
CA506_Project_2063_fml	12/28/2023 4:25 PM	TIF File	43 KB
SO509_Project_2063_fml	12/28/2023 4:25 PM	TIF File	189 KB

Step 4: GridFire part 2, Inputs

- In share/rem/<project_name>/gridfire/gridfire_inputs there will be a .tif of each fuel & canopy variable for each timestep for each baseline and project (90 files + the multiband folder), and a /multiband folder with a multiband .tif for each timestep for each baseline and project (18 files).

Step 5: GridFire part 3, Execution

- In share/rem/<project_name>/gridfire/runs there is a folder for each timestep for each baseline and project. In each of those folders are 2 folders labeled 'inputs' and 'outputs'. When this step is finished running there will be 5 files in each /outputs folder. The outputs for Project_<end year> will typically be the final outputs generated, monitor this folder to confirm completion.

Name	Date modified	Type	Size
burn_count	12/29/2023 9:04 PM	TIF File	3,151 KB
burn_probability	12/29/2023 9:04 PM	TIF File	3,422 KB
flame_length_max	12/29/2023 9:04 PM	TIF File	27,061 KB
flame_length_sum	12/29/2023 9:04 PM	TIF File	30,048 KB
summary_stats	12/29/2023 9:04 PM	CSV File	1,553 KB

Step 6: GridFire part 4, Outputs

- In share/rem/<project_name>/gridfire/outputs there is a csv file titled 'average_fire_sizes' – when that file stops updating (the 'Date modified' will periodically update as this step runs). I usually give it 20-30 minutes of no updating just to be sure before proceeding to the next step.

Step 7: Carbon

- Runs fast, but still check the carbon folder for the 2 csv files 'carbon_summary_data' and 'stand_acres' AND that they are >OKB in size.

Step 8: FOFEM

- The folder fofem/ will have 11 files in it.

srv (\\10.1.30.142) (X:) > share > rem > FA016_GSLC_FRR_V1 > fofem				
	Name	Date modified	Type	Size
✚	baseline_FOFEM_amended	2/5/2024 1:38 PM	CSV File	13,829 KB
✚	baseline_FOFEM_error	2/5/2024 1:37 PM	Text Document	1 KB
✚	baseline_FOFEM_input	2/5/2024 1:23 PM	CSV File	10,501 KB
✚	baseline_FOFEM_log	2/5/2024 1:37 PM	Text Document	1 KB
✚	baseline_FOFEM_output	2/5/2024 1:37 PM	CSV File	12,894 KB
	FOFEM_results	2/5/2024 1:38 PM	CSV File	3 KB
	project_FOFEM_amended	2/5/2024 1:38 PM	CSV File	652 KB
	project_FOFEM_error	2/5/2024 1:38 PM	Text Document	1 KB
	project_FOFEM_input	2/5/2024 1:23 PM	CSV File	498 KB
	project_FOFEM_log	2/5/2024 1:38 PM	Text Document	1 KB
	project_FOFEM_output	2/5/2024 1:38 PM	CSV File	611 KB

Step 9: Delayed Regeneration

- The 'delayed_reforestation' folder and file will appear

Step 10: Quantification

- The 'quantification' folder will appear with these 3 files:

srv (\\10.1.30.142) (X:) > share > rem > FA016_GSLC_FRR_V1 > quantification				
	Name	Date modified	Type	Size
✚	area_report	2/5/2024 2:08 PM	CSV File	1 KB
✚	FA016_GSLC_FRR_V1_quantification	2/5/2024 2:08 PM	DB File	88 KB
✚	FMU_report	2/5/2024 2:08 PM	CSV File	2 KB
